PROFESSIONAL SUMMARY

Final-year B-Tech student in Computer Science & Engineering and Data Science, offering a foundational hybrid skill set across cloud computing, network engineering, and modern AI-driven development. Demonstrated hands-on understanding of AWS cloud services and daily network infrastructure operations. Adept in utilizing LLM-orchestrated workflows to rapidly generate automation scripts, backend logic, and web/mobile applications, effectively bridging traditional system administration with accelerated AI-native deployment.

SKILLS AND EXPERTISE

Cloud & AWS Services: AWS, Amazon S3, Amazon CloudFront, AWS IAM, Amazon VPC, AWS Lambda, Amazon DynamoDB, AWS Cognito, Amazon SES, AWS Amplify, Amazon API Gateway, Amazon RDS, AWS Management Console.

AI & LLM Workflows: AI assisted software development, LLM orchestration, automated infrastructure script generation, advanced prompt engineering, rapid prototyping.

Technical Skills: Cloud architecture basics, network troubleshooting, system administration, hardware specifications analysis, VCS including Git and GitHub.

Soft Skills: Complex problem solving, cross-functional collaboration, analytical thinking, technical adaptability.

EXPERIENCE

Network Engineer Trainee

May 2026 – Present

Smartlink Solutions Pvt. Ltd.

Bhubaneswar, Odisha

- Assist in the active monitoring and maintenance of core network infrastructure to ensure high availability and minimal service downtime.
- Troubleshoot complex connectivity issues and configure network hardware to support reliable local service delivery.
- Collaborate with technical teams to deploy network security protocols and optimize routing configurations for improved latency.

Cloud Computing Intern

January 2026 – April 2026

Rooman Technologies

Bengaluru, Karnataka

- Executed a comprehensive 400-hour technical internship focusing on enterprise-grade IT infrastructure and network engineering.
- Standardized security protocols and managed hardware configurations across multiple simulated enterprise deployments.
- Resolved network latency challenges by collaborating within technical teams to ensure seamless system administration.

EDUCATION

Bhubaneswar Engineering College

Bhubaneswar, Odisha

Bachelor of Technology in Computer Science & Engineering and Data Science

Graduation: 2026

Certification:

AWS Cloud Support Associate Professional Certificate

PROFESSIONAL DEVELOPMENT

Network Automation Tool | [GitHub](#)

- Engineered a Python-driven network automation pipeline, leveraging LLM assisted workflows to rapidly generate Paramiko scripts for zero-trust SSH key-based authentication.
- Decoupled execution payloads from fleet inventory matrices for scalable multi-device targeting, generating per-device telemetry logs to establish an immutable audit trail.

KalingaSync AI Enterprise | [GitHub](#)

- Architected a fully serverless, event-driven enterprise workforce platform utilizing 3 core serverless tools (AWS Lambda, Amazon API Gateway, and AWS Amplify) to ensure zero-maintenance scaling and high availability.
- Leveraged AI guided workflows to efficiently generate secure backend logic via AWS Cognito, enforcing strict RBAC and validating JWT claims.
- Integrated Amazon DynamoDB for state management alongside Amazon S3 secure storage and Amazon SES automated notifications, strictly governed by AWS IAM policies.
