PROFESSIONAL SUMMARY

Recent B-Tech graduate in Computer Science & Engineering and Data Science, offering a foundational hybrid skill set across cloud computing, network engineering, and modern AI-driven development. Demonstrated hands-on understanding of AWS cloud services and daily network infrastructure operations. Adept in utilizing LLM-orchestrated workflows to rapidly generate automation scripts, backend logic, and web/mobile applications, effectively bridging traditional system administration with accelerated AI-native deployment.

SKILLS AND EXPERTISE

Cloud & AWS Services: AWS, Amazon S3, Amazon CloudFront, AWS IAM, Amazon VPC, AWS Lambda, Amazon DynamoDB, AWS Cognito, Amazon SES, AWS Amplify, Amazon API Gateway, Amazon RDS, AWS Management Console.

Networking & IT: OLT Web Management, Observium, CRM, NAS, PuTTY (Telnet), switch port administration, hardware configuration, zero-trust security, system administration, VCS (Git/GitHub).

AI & LLM Workflows: AI assisted software development, LLM orchestration, automated infrastructure script generation, advanced prompt engineering, rapid prototyping.

Soft Skills: Complex problem solving, cross-functional collaboration, analytical thinking, technical adaptability.

EXPERIENCE

Network Engineer Trainee

May 2026 – Present

Smartlink Solutions Pvt. Ltd.

Bhubaneswar, Odisha

- Monitored ISP infrastructure via Observium and OLT web portals, leveraging PuTTY (Telnet) for direct switch access to log RX power metrics and administer ports for field team operations.
- Administered remote technical support utilizing CRM and NAS systems, rapidly diagnosing customer connectivity issues and executing MAC resets to minimize downtime.
- Conducted 100+ on-site client visits for escalated network faults, troubleshooting complex device configurations and local hardware parameters to restore high availability.

Cloud Computing Intern

January 2026 – April 2026

Rooman Technologies

Bengaluru, Karnataka

- Executed a comprehensive 400-hour technical internship focusing on enterprise-grade cloud architecture and virtual networking.
- Standardized IAM security protocols and managed cloud resource provisioning across multiple simulated enterprise deployments.
- Resolved virtual routing challenges by collaborating within technical teams to optimize cloud environments and ensure seamless administration.

EDUCATION

Bhubaneswar Engineering College

Bhubaneswar, Odisha

Bachelor of Technology in Computer Science & Engineering and Data Science

Graduated: 2026

Certification:

AWS Cloud Support Associate Professional Certificate

PROFESSIONAL DEVELOPMENT

Network Automation Tool | [GitHub](#)

- Engineered a Python-driven network automation pipeline, leveraging LLM assisted workflows to rapidly generate Paramiko scripts for zero-trust SSH key-based authentication.
- Decoupled execution payloads from fleet inventory matrices for scalable multi-device targeting, generating per-device telemetry logs to establish an immutable audit trail.

KalingaSync AI Enterprise | [GitHub](#)

- Architected a fully serverless, event-driven enterprise workforce platform utilizing 3 core serverless tools (AWS Lambda, Amazon API Gateway, and AWS Amplify) to ensure zero-maintenance scaling and high availability.
- Leveraged AI guided workflows to efficiently generate secure backend logic via AWS Cognito, enforcing strict RBAC and validating JWT claims.
- Integrated Amazon DynamoDB for state management alongside Amazon S3 secure storage and Amazon SES automated notifications, strictly governed by AWS IAM policies.
